Recycling Update on COVID-19

During the time of COVID-19 restrictions, we will continue curbside collection of recycling as scheduled. This will allow our residents to keep putting their carts to the curb on the correct collection day. We have the ability to store a limited amount of recycling, but there may be a time it will go to the garbage. There will continue to be no tipping fee for any recycling loads.

We will also be delaying our White Goods collection program for one month. Normally the white goods recycling program would begin April 1st, however due to the restrictions and limited staff, the start of this program will now be May 1, 2020 unless otherwise stated.

We know this is confusing times, but keeping our scheduled routines will help keep our residents in the recycling habit, encouraging more people to continue to recycle after this is done. So, for now, we will be asking resident to continue the program as normal until further notice.

Thank you.
